

Product Requirements Document (PRD)

Product Name

Agentic Conference Secretary

Product Type

AI-powered, context-aware, cross-platform (iPhone + Mac + Cloud)
Conference Intelligence & Relationship Operating System

1. Product Vision

Create a frictionless, always-on AI assistant that:

- Captures real-world interactions (audio, images, context)
- Converts them into structured, actionable intelligence
- Builds a persistent relationship and knowledge graph
- Improves user performance over time

The system acts as:

- Secretary
 - Analyst
 - CRM
 - Memory
 - Performance Coach
-

2. Problem Statement

Professionals attending conferences face:

- Fragmented note-taking
- Lost contacts and missing context
- Weak or inconsistent follow-ups
- No measurement of conference ROI
- No persistent memory across events

Existing tools are:

- Manual
 - Siloed
 - Not context-aware
 - Not adaptive
-

3. Solution Overview

The Agentic Conference Secretary:

1. Captures everything
2. Audio
3. Images
4. Metadata
5. Understands context
6. Conference type
7. Interaction type
8. User intent
9. Structures data into:
10. Contacts
11. Sessions
12. Conversations
13. Builds:
14. Knowledge graph
15. Relationship network
16. Generates outputs:
17. Summaries

- 18. Follow-ups
 - 19. Reports
 - 20. Learns over time:
 - 21. Improves recommendations
 - 22. Adapts to user behavior
-

4. Target Users

- Venture capitalists / investors
 - Executives / operators
 - Consultants
 - Sales leaders
 - Researchers
 - Conference-heavy professionals
-

5. Core Product Modules

5.1 Capture Layer (iPhone / iPad)

Features

- One-tap Conference Mode
- Always-on:
 - Audio recording
 - Transcription trigger
- Camera capture:
 - Badges
 - Slides
 - Business cards
 - Booths

Requirements

- Ultra-low friction
 - Background operation
 - Battery-efficient
-

5.2 Context Engine

Responsibilities

- Classify conference type
- Identify interaction type
- Infer user intent
- Ask minimal clarifying questions

Output

Structured context metadata attached to all objects

5.3 Contact Intelligence System

Inputs

- Badge photos (OCR)
- LinkedIn data
- Business cards
- Voice introductions
- Calendar meetings

Features

- Identity resolution (merge duplicates)
 - Context tagging:
 - Meeting
 - Panel
 - Chance encounter
 - Relationship scoring
 - Confidence scoring
-

5.4 Session & Conversation Intelligence

Panel Mode

- Speaker identification
- Diarization
- Quote extraction
- Insight summarization

Presentation Mode

- Speaker profiling

- Slide-to-topic mapping
- Structured breakdown

Outputs

- Session summary
 - Key insights
 - Linked images + transcripts
-

5.5 Image Processing Pipeline

Functions

- Slide enhancement
 - Perspective correction
 - OCR extraction
 - Image-to-session linking
-

5.6 Knowledge Graph Engine (CORE)

Entities

- People
- Companies
- Sessions
- Conversations
- Conferences
- Topics

Relationships

- met_at
- spoke_at
- introduced_by
- discussed
- followed_up

Core Objective

This becomes the central intelligence layer.

5.7 Plugin / Integration Layer

Integrations

- LinkedIn
 - Gmail / Outlook
 - Calendar
 - CRM (Salesforce, HubSpot, Affinity)
 - Contacts
 - Notes / Drive
-

5.8 Output & Reporting Layer

Per Interaction

- Meeting summary
- Contact profile
- Follow-up draft

Per Session

- Structured summary
- Slide archive
- Key takeaways

Daily Summary

- Top contacts
- Insights
- Action items

Conference Report

- Trends
 - Opportunities
 - Network insights
 - Recommendations
-

5.9 Performance & Coaching System

Conference Score

- Content quality
- Network quality
- Insight density

User Score

- Time allocation efficiency
- Interaction quality
- Follow-up completion

Coaching Output

- Behavioral recommendations
 - Missed opportunities
 - Improvement suggestions
-

5.10 Long-Term Memory System

Features

- Persistent conference history
 - Cross-event analysis
 - Relationship compounding
 - Trend detection
-

5.11 Network Graph Intelligence

Features

- Visual relationship mapping
 - Identify:
 - Key connectors
 - Repeated interactions
 - High-value nodes
-

6. Platform Architecture

iPhone / iPad

- Capture layer
- Real-time prompts

Mac / Desktop

- Deep analysis
- Reporting

- Editing

Cloud Backend

- Heavy AI processing
 - Graph storage
 - Cross-device sync
-

7. AI / Agentic Architecture

Core Design

Multi-Agent System

Agents

1. Capture Agent

Handles ingestion of audio/images.

2. Transcription Agent

Speech-to-text + diarization.

3. Vision Agent

OCR, object detection.

4. Context Agent

Conference + interaction classification.

5. Identity Agent

Person/company resolution.

6. Summarization Agent

Structured outputs.

7. Graph Agent

Updates relationships.

8. Follow-Up Agent

Drafts outreach.

9. Coaching Agent

Performance insights.

Model Stack

LLM Layer

- Frontier LLM (OpenAI / Anthropic class)
- Smaller on-device models

Speech Layer

- Whisper-class models

Vision Layer

- Multimodal LLM + CV stack

Retrieval Layer

- Vector DB (RAG)
- Graph DB

Data Storage

- Vector DB → semantic search
 - Graph DB → relationships
 - Object storage → media
 - Relational DB → structured data
-

8. Privacy & Compliance

Requirements

- Explicit recording consent workflow
- Visible recording indicators
- Encrypted storage
- User-controlled retention
- Compliance with regional laws

9. V1 Scope (Recommended)

Must-Have

- Audio capture + transcription
- Basic contact creation
- Meeting summaries
- Follow-up drafts
- Cloud sync

Defer

- Full knowledge graph
 - Coaching system
 - Deep integrations
 - Advanced profiling
-

10. Success Metrics

Product Metrics

- Percentage of interactions captured
- Summary accuracy
- Follow-up conversion rate
- Daily usage during conferences

Business Metrics

- User retention
 - Time saved
 - Conference ROI improvement
-

11. Strategic Positioning

Category

AI-native conference + relationship intelligence platform

Not

- Note-taking app
- Transcription tool
- CRM

But

A persistent intelligence layer for real-world interactions.

12. Future Expansion

- Wearables (glasses, AirPods)
 - Real-time coaching
 - Team intelligence
 - Enterprise analytics
 - Conference benchmarking
-

Final Note

This product succeeds only if:

- It is invisible to use
- It delivers same-day value
- It compounds value over time
